Mining Product Readiness Assessment

Your technology shows promise. But what must change before it can become a product that can be deployed and supported repeatedly?

What you need

For technology CEOs and CTOs with a working mining solution or investors considering funding a mining technology: identify the product readiness gaps and the priorities to address next in a focused assessment, normally completed within 4 weeks, before committing resources to productization.

One assessment. Two decision lenses.

For the CEO / CTO: understand the gaps your team needs to address and the priorities to use when planning execution and seeking funding.

For the investor: understand current technical maturity, the gaps that remain and the priorities that inform your investment assessment.

What you leave with

- A readiness assessment showing where the product stands today, supported by the available evidence.
- A prioritized roadmap showing the key gaps, risks and dependencies, what to tackle first and what can wait.
- An executive review with your leadership team to discuss the findings and next decisions.
- A clear basis for your team and preferred delivery resources to estimate implementation effort, cost and schedule.
- A clear path forward, whether you execute with your own team or engage Spyke for selected support.

How it works

Agree on the product, application context and target next stage. Review the technology, documentation, test evidence and plans with the CEO / CTO and technical team. Assess and prioritize the gaps. Present the roadmap and discuss the next decisions with leadership.

Your next step is your choice

Use the roadmap with your own team, engage Spyke's services for selected elements, or commission a reassessment after the gaps have been addressed.

Investment

CAD $15,000 fixed fee, plus applicable taxes and applicable travel costs if in person meetings are desired.
Terms: 50% at mobilization and 50% upon delivery

Continuation bonus: receive a CAD $2,000 credit toward our Mining Productization Leadership Program or to reassess your product's readiness.

Spyke Delivery Promise

If you are not satisfied that the assessment meets the agreed scope and acceptance criteria, we will work with you to make it right at no additional professional fee. If we cannot resolve your concerns to your satisfaction, we will refund or waive the delivery installment to reflect the unresolved work.

Availability

One opening available per month. Next available start is in January 2027. Secure it before December 15th, 2026.
