Mining Productization Leadership Program

You know your productization priorities. But who will lead the technical work, coordinate the right specialists and help your team sustain delivery?

What you need

For technology CEOs and CTOs ready to advance a mining product: lead priority productization work and strengthen your team's delivery capability through a phased leadership program, with scope, capacity and target milestones agreed before each phase begins.

Senior leadership. Stronger delivery capability.

Bring experienced technical leadership into your team to turn priorities into action, coordinate specialist contributions and build the capability to sustain progress.

Your team keeps ownership of the product and its direction. Spyke helps you move it forward.

What you gain

- A practical execution plan with clear priorities, responsibilities and milestones.
- Senior technical leadership for key decisions, reviews and readiness progress.
- Coordinated contributions from your team and selected specialists.
- Knowledge transfer and practical handovers that strengthen your team's delivery capability.
- Continued technical guidance to help your team sustain progress and respond to new insights.

How it works

Start with your productization priorities, whether established through a Spyke readiness assessment or your own team's work. Together, confirm the starting point, agree on the next work packages and align the right resources. Review progress and adjust the level of support as the work advances and your team takes on more of the delivery.

Surge: turn priorities into an execution plan, define initial work packages and align responsibilities and specialist support.

Transition / Execute: lead priority technical work, coordinate specialist contributions and transfer execution knowledge to your team.

Ongoing Technical Advisory: retain focused guidance for technical decisions, reviews and mentoring, independently or after active execution.

Investment

Support	Investment
Surge	$250/hour. Plan for up to 80 hours/month, or $20,000 at full use.
Transition / Execute	$250/hour. Plan for up to 40 hours/month, or $10,000 at full use.
Ongoing Technical Advisory	$4,000/month for up to 16 hours of reserved capacity.

All fees are in Canadian dollars, plus applicable taxes, agreed travel costs and separately approved external specialist fees.

Terms: Surge and Transition / Execute are billed monthly for hours used. Ongoing Technical Advisory is billed monthly in advance, with an initial three month commitment.

Continuation bonus: save $1,000 on your first month of Ongoing Technical Advisory when you transition directly from the completed Surge and Transition / Execute phases.

Spyke Delivery Promise

If our work does not meet the agreed requirements, we will make it right at no additional professional fee. If we cannot resolve the issue, we will refund or waive the professional fee for the affected work.

Your next step

One opening available per month. Next available start is in January 2027. Secure it before December 15th, 2026.
